

Cesar Renato Cáceres Avendaño

QA Engineer · API Testing · Web & Mobile Testing

Guatemala City · (502) 4770-5689 · crcaceres05@gmail.com · linkedin.com/in/crcaceres05

PROFESSIONAL SUMMARY

Senior IT Engineer with 16+ years of experience, the last 5 at Ericsson specializing in QA Automation, API Testing, and quality validation of critical systems in international corporate environments. Designed and executed end-to-end testing strategies for REST/SOAP APIs, microservices, and web platforms, working in English with distributed teams across the U.S., Europe, and Asia.

Full software quality lifecycle experience: test plan and test case design, automation with Python and Selenium, API testing with Postman, data validation with SQL, defect management in Jira/Xray, and continuous integration in CI/CD pipelines with GitLab and Jenkins. Goal-oriented professional with a proven track record in product companies with high transaction volumes and Agile teams.

TECHNICAL SKILLS

Languages: Python · SQL · JavaScript · Bash · Shell Scripting

API Testing: Postman · REST · SOAP · GraphQL · SwaggerHub · OpenAPI · Insomnia

Databases: SQL Server · PostgreSQL · MySQL · Oracle · QA Data Validation Queries

Observability: Grafana · Kibana · Splunk · Log Analysis · Performance Monitoring

QA & Test Automation: Selenium · Cypress · Robot Framework · pytest · SOAP UI · JMeter · Appium

Test Management: Jira · Xray · TestRail · Confluence · Regression Testing · BDD

CI/CD & DevOps: GitLab CI/CD · Jenkins · Docker · Kubernetes · Git · Linux

Cloud & Platforms: Google Cloud · Azure · Power BI · SharePoint · Microsoft 365

WORK EXPERIENCE

Ericsson

Full-time · 5 years 1 month · Guatemala

IT Engineer — Pipeline Automation & Quality *Dec 2025 – Present*

Guatemala City · Hybrid

- Integrated automated testing frameworks into CI/CD pipelines using GitLab and Jenkins, preserving quality gates and reducing regression failures across globally distributed teams.
- Designed delivery pipelines with built-in quality checkpoints; configured runners for continuous execution of functional and regression test suites.

RAN Data & Performance Support Engineer *Apr 2025 – Dec 2025*

Guatemala · Remote

- Validated KPIs and 4G/5G network performance metrics through SQL queries and Python scripts; tracked and reported data discrepancies using structured defect methodology.
- Collaborated with R&D teams across multiple time zones to ensure accuracy of critical data, documenting findings in Confluence and managing follow-ups in Jira.

Automation Developer — Data Workflow & Process Automation *Aug 2024 – Mar 2025*

Guatemala City · Remote

- Designed and implemented automation workflows using Power Apps and Power Automate, eliminating manual processes and reducing operational cycle time for international teams.
- Integrated SharePoint as a data repository with audit traceability and version control, improving status visibility for teams across multiple countries.

Network Automation Engineer — Power Outage Automation *Feb 2024 – Jul 2024*

Guatemala City · Remote

- Developed Ansible playbooks for automated VNF inventory and shutdown/startup sequencing for Mexico City telecom infrastructure at risk of power outages.

- Implemented post-restoration validation scripts to verify service availability and correct status after recovery, ensuring ordered and incident-free network restart.

Cloud-Native QA Engineer — API Test *Feb 2023 – Jan 2024*

Guatemala City · Remote

- Designed and executed comprehensive API testing strategies (functional, regression, load, and security) for critical microservices using Postman, SOAP UI, and JMeter; documented test cases in Jira.
- Managed full defect lifecycle in Jira/Xray: reporting, prioritization, tracking, and fix validation; analyzed application logs with Grafana, Kibana, and Splunk in Kubernetes environments.

Test Automation Engineer *Mar 2022 – Jan 2023*

Guatemala City · Remote

- Led test automation strategy for critical telecom system integrations; developed automated regression scripts in Python with pytest and Selenium, significantly reducing manual execution time.
- Managed test plans and requirements traceability in Jira; reported quality metrics to stakeholders in the U.S. and Europe in English.

IT Engineer / Tester *Jul 2021 – Feb 2022*

Guatemala · Remote

- Designed functional, boundary, and negative test cases; performed manual and exploratory testing on APIs and web interfaces within an Agile/Scrum methodology.
- Collaborated with developers on bug reproduction and validation; documented results and managed defects in Jira within 2-week sprint cycles.

HCL Technologies

Full-time · 1 year 11 months · Guatemala

Software Technical Specialist — Xerox *Sep 2019 – Jul 2021*

Guatemala · On-site

- Technical consultant for enterprise software deployments (Xerox Workplace Cloud) for clients in the U.S. and Central America; executed functional validations and User Acceptance Testing (UAT) prior to production.
- Developed reports and dashboards with Microsoft Power Platform; implemented and validated SSO integrations between cloud platforms and client systems.
- Led POCs with structured technical testing for Print Management and Content Security solutions for large enterprise accounts.

Conduent

Full-time · 1 year 11 months · Guatemala · Hybrid

IT Production Control Analyst — Healthcare Division *Nov 2017 – Sep 2019*

Tetra Center, Guatemala · Hybrid

- Managed production environments for large-scale medical document digitization systems; monitored data quality and ran SQL validation queries to detect inconsistencies in processing pipelines.
- Built performance reports with SQL Server Reporting Services (SSRS); led root cause analysis for critical incidents and coordinated resolution with teams in India and the Philippines.
- Led end-to-end UAT implementations, managed SLA compliance, and administered databases and application servers in a multinational environment.

Krones Inc.

Full-time · 5 years 5 months · Guatemala · On-site

IT Technical Services Assistant *Jul 2012 – Nov 2017*

Guatemala · On-site

- Participated in SAP Business One implementation, supporting configuration of inventory and asset management modules; validated data integrity post-migration using SQL queries.
- Administered IT infrastructure and Tier-2 support for a multinational manufacturing environment; coordinated escalations with German headquarters and U.S. subsidiaries.

- Developed technical documentation, IT policies, and operating procedures; managed technology asset inventory and lifecycle.

Sistran

Full-time · 1 year 5 months · Guatemala · On-site

IT Technical Support Assistant *Oct 2010 – Feb 2012*

Guatemala · On-site

- Provided technical support to software development teams for insurance platforms in Argentina, Colombia, and Panama; ensured availability of testing environments and version control tools.
- Administered virtual machine environments for distributed development and QA teams; coordinated availability of tools and test environments.

EDUCATION

Universidad Mariano Gálvez de Guatemala *2020 – Present*

Bachelor's in Computer Science and Systems Engineering

DataCamp *Jan 2026 – Present*

Professional Certificate — Data Engineering (Python · SQL · Airflow · ETL)

Código Facilito *Jun 2024 – Oct 2024*

Data Science Bootcamp — pandas · polars · data analysis

KodeKloud *Nov 2023 – 2024*

Automated Software Testing — Selenium · pytest · CI/CD · API Testing

Core Code IO *2021 – 2022*

QA Automation Testing — Selenium · Jenkins · CI/CD · REST Assured · Postman

ESI School of Management *2020*

SCRUM Manager v2 — Agile Methodologies

Universidad Galileo *2018*

Database Technician — Microsoft SQL Server, Data Modeling & Warehousing (MCSA)
